

CSIC 2010 e-commerce

36,000 normal + 25,065 attacks = 61,065 Requests

Exact duplicate removal

same method + full URL + body = duplicate

25,608 unique requests

58.1% of rows removed, attack share 41.0% to 62.3%

Random split
duplicates kept
3 seeds

Exact-dedup split
no shared requests
3 seeds

Endpoint held out
no shared endpoint
5 folds

Train seven tiers on every split

set thresholds on validation normals
at 1% FPR and 0.1% FPR

Detection

recall at matched FPR
AUC for comparison
paired bootstrap
sign stable in every seed

Serving cost

node visits per request
p50 and p99 latency
single request, one thread
two cloud sessions

Deployment frontier

feasible tiers per operating point and deadline
